About Software Freedom Day
Software Freedom Day (SFD) is a global, grassroots effort to educate the public about the benefits and availability of Free and Open Source Software. The non-profit company Software Freedom International (http://www.softwarefreedomday.org/) coordinates SFD at a global level. Volunteer teams throughout the world organise local SFD events around the third Saturday in September.

The Software Freedom Day events in 2007 and 2008 hosted by the Trinidad and Tobago Computer Society both received a "highly commended" award out of 500 international teams from Software Freedom International.

About the Trinidad and Tobago Computer Society
The Trinidad and Tobago Computer Society is a computer user group formed in 1997. We:
- Are a forum where computers, related technologies and related social issues are discussed;
- Keep current with the events in the local Information Technology (IT) and telecommunications industries;
- "*Network local computer users*" so that they can share knowledge and improve upon their experiences with modern technology.

Membership in the Trinidad and Tobago Computer Society is open to anyone interested in computers regardless of the level of their computer experience or the type of hardware or software they use. We have regular meetings, mailing lists, podcasts, active wikis, and our website (http://www.ttcsweb.org/). The TTCS also holds membership in several international organisations and takes an advisory role on computer issues in Trinidad and Tobago.
